---

## PROJECTS

### Chat Application :

- Developed a real-time chat application using React.js, MongoDB, and Express.js, enabling seamless communication between users.
- Implemented MongoDB for efficient data storage and retrieval, ensuring scalability and performance.
- Utilized React.js for building an intuitive and interactive user interface, enhancing user experience.

### Real Estate Full Stack Project :

- Developed a full-stack real estate application using the MERN stack, demonstrating proficiency in MongoDB, Express.js, React, and Node.js.
- Implemented responsive design, user authentication, and integrated third-party APIs for enhanced functionality, ensuring a seamless and secure experience for property seekers.

### Blood Donation Website :

- Designed and developed a comprehensive blood donation website utilizing the MERN stack.
- Implemented user registration functionality to onboard donors and recipients, providing a seamless experience for users to specify and receive desired blood types.
- Leveraged MongoDB for efficient data management, ensuring secure storage and retrieval of user information and donation requests within the platform.
